Objective: Backend Developer with 4 years of experience building scalable web applications and RESTful APIs using PHP (Laravel), Node.js (Express), MySQL, PostgreSQL, and MongoDB, seeking to join a professional organization where I can utilize my skills in authentication systems, admin panels, backend architecture, cloud deployment, and performance optimization to add value and grow professionally.

Work Experience

Notion Technologies | July 2024 – Apr 2026

Key Accountabilities:

- Developed and maintained production web applications using Laravel, PHP, MySQL, and RESTful APIs.
- Designed and implemented scalable backend architectures for high-performance applications.
- Built secure authentication and authorization systems using Laravel Sanctum, Passport, and role-based access control.
- Developed reusable API services and integrated third-party APIs and payment gateways.
- Created and maintained admin panels, dashboards, and reporting modules.
- Optimized SQL queries, database indexes, and application performance to improve response times.
- Implemented file uploads, notifications, email services, and background job processing.
- Managed deployment processes and maintained Linux server environments using Nginx and Apache.
- Collaborated with frontend developers for seamless integration with React.js applications.
- Participated in code reviews, debugging, bug fixing, and production support activities.

NextNeuron Technologies | Jan 2023 – June 2024

Key Accountabilities:

- Developed RESTful APIs and backend business logic using Laravel framework.
- Implemented authentication and authorization using Sanctum, Passport, and JWT.
- Built reusable modules and dynamic admin dashboards for internal business operations.
- Designed and maintained database schemas, migrations, and Eloquent relationships.
- Integrated third-party services such as email providers, SMS services, and external APIs.
- Improved database query performance through indexing, eager loading, and query optimization.
- Worked closely with frontend teams for API integration and troubleshooting.

- Participated in requirement analysis, feature development, testing, and deployment activities
- Maintained code quality using Git version control and collaborative development workflows.

Cloudzurf Technologies | Apr 2022 – Dec 2022

Key Accountabilities:

- Developed and maintained PHP-based web applications and business modules.
- Assisted in backend API development and frontend integration activities.
- Worked with MySQL databases for CRUD operations and data management.
- Performed API testing and debugging using tools such as Postman.
- Implemented responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Fixed bugs, resolved production issues, and improved application stability.
- Collaborated with senior developers during development and deployment cycles.
- Participated in testing, maintenance, and documentation activities.

Technical Skills:

Backend: PHP, Laravel, Node.js, Express.js, REST APIs

Frontend: HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Deployment: GCP, AWS, NGINX, Apache

Tools: Git, GitHub, Postman

Educational Qualification:

BCA – University of Meerut (2019–2022)

HSC – UP Board (2018)

ADCA – Hi-Tech (2017)

SSC – UP Board (2016)

Soft Skills:

Self-motivated and proactive professional with strong communication and interpersonal skills, a collaborative team mindset, adaptability in fast-paced environments, problem-solving strengths, and a positive, performance-driven attitude.

Hobbies:

Travel and reading.

Languages Known:

Hindi, English, and Urdu.
